Report of the Mayor

To the Citizens of Rutland:

The City government was operated during 1932 under a considerable handicap.

The money available was limited to such an extent that it was impossible to take proper care of much City property, especially streets, sidewalks, etc.

The fact that available funds did not permit the purchase of oil caused more work of certain kinds on the streets than has been the case in other years. The lack of oil to hold the surface together allowed the development of more holes and bad spots. However, as good care was taken of the streets as was possible with the available money.

Approximately \$50,000 for interest, plus \$37,000 for bonds due (largely Schoolhouse Bonds), taken out of the proceeds of a \$3.60 tax rate, left a very small amount on which to operate the City's business and pay necessary expenses.

A deficit of \$24,000 existed in the Charities Department in 1931. It was necessary to borrow money to take care of this item, with the result that the amount of this deficit was practically carried over into 1932.

Outside of the Water Department, no new work was done this past year, except on trunk line sewers which were paid for with the proceeds of bonds issued in 1931.

We closed the year of 1932 with no deficit in any department except the Charities Department.

The necessary expenses of that department are governed entirely by circumstances over which no direct control is possible. Indigent families must be fed, clothed, kept warm and given a certain amount of medical attention. Expenses in that department have necessarily exceeded those of normal years because of conditions which are both abnormal and general. At the same time, these expenses compare favorably with those of other communities under similar conditions.

Seemingly, proper consideration was not given to these facts in making a tax rate of \$3.60 as that rate made no provision for unusual and probable expenses in that department.

Consequently, a deficit resulted.

I trust that some arrangement will be made so that the City will have an income in 1933 that will be sufficient to pay at least a part of this 1932 deficit, and also to take full care of current expenses in the Charities Department, which I believe are likely to continue abnormal during the year 1933.

I can not think that it is either proper or economically sound for the City to go on raising, from year to year, a sum that is insufficient to take suitable care of the City's property or to provide for the necessary requirements of the Charities Department.

I do not see how anything is actually gained by endeavoring to keep down the tax rate each year, with a resulting deficit, accumulating from year to year. The continued creation of such a deficit by a municipality certainly does not help its credit or enable it to borrow money at a low rate of interest.

There is a minimum beyond which expenses can not be reduced without injury to the property of the City and curtailment of necessary service to the people. When economy becomes false economy, it defeats its own purpose.

I recommend that the taxpayers give careful consideration to the detailed reports of the various departments. I think they will find them interesting and instructive. They have been painstakingly prepared by the persons best informed on the departmental work of the City.

I wish to thank the heads of the various City departments, and the men working under them, for their loyalty to the City during the year of 1932, and particularly for their co-operative attitude in regard to the wage cut.

Respectfully submitted,

ARTHUR W. PERKINS,
Mayor.

Report of City Treasurer

To the Honorable City Council, City of Rutland, Vermont:
Gentlemen:

I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1932.

RECEIPTS

Taxes received by City Treasurer	\$468,876 14

Report of Commissioner of Public Works

To the Honorable City Council:

Gentlemen:—

I submit herewith the report of the Commissioner of Public Works for the year ending Dec. 31, 1932. During the first eight months the work was performed under the direction of Richard H. Royce.

STREET DEPARTMENT

With the exception of the Woodstock Avenue concrete pavement, the street work consisted largely of maintenance. The road machine worked during the regular season shaping and smoothing the sections of roadway that were rough. During September, October and early November the steam roller worked with the road machine to keep all the streets in the City shaped and compacted as fast as traffic developed roughness. This combined outfit improved 148,000 square yards of street surface during these three months. No road oiling was done on these streets and as a result the smoothing of the surface with the road machine and roller had no lasting results and had to be repeated as often as traffic made the surface rough again. When the ground froze in November all streets were in fair condition but unseasonal thaws in late December softened the surface and traffic rutted some streets badly.

The only surface treatment applied this year was on Selected State Highways, Lincoln Ave., Grove St. and Creek Road. The cost of approximately one half of this work was covered by State Aid. These three streets received one coat of Tarvia B, covered with stone screenings. 7,080 gallons of the tar were used.

A considerable amount of gravel was spread on the streets that break up in the spring. A gravel walk was built on the north side of Columbian Avenue and West Street, and one on the east side of South Main Street. Several rough and broken sidewalks were smoothed up with gravel. The shoulders of all the concrete roads were worn and in a dangerous condition. During the Fall this condition was remedied by adding gravel to bring the shoulders to the same grade as the concrete. This required 292 cu. yds. of gravel. About 26,000 feet of shoulders were improved.

Gravel was drawn from the same pit in West Rutland that was operated last year. A total of 3,368 cu. yds. of gravel was used on street work, 2,259 cu. yds. of which was crushed and 1,109 cu. yds. of which was bank-run. These totals do not include the gravel used on the make-work jobs.

The concrete pavement joints and cracks were filled with Standard Asphalt B applied hot. The work was quite extensive as the pavements, especially in the downtown section, were badly in need of treatment. About 98,000 ft. of joints and cracks were filled.

The Pine Hill Crusher operated from January 1 to January 28 and produced 347 cu. yds. of crushed stone.

Cold Patching on the asphalt streets was done with Koldlade, a bituminous material similar to sheet asphalt. All other cold patching was done with a mixture of Standard Cold Patch Asphalt and stone screenings, prepared in the City yard. Keeping the streets patched required 180 cu. yds. of Cold Patch and 20 tons of Koldlade.

The Woodstock Avenue concrete pavement, although using make-work labor, was a street department job and was paid for partly by street department funds and partly by State Aid for permanent highway work. This construction, consisting of 597½ feet of 18-foot pavement, is in four separate sections. It was laid on those portions of Woodstock Avenue that broke up in the Spring. These sections are laid to the line and grade of a permanent pavement. They will join on to any future work and will not have to be replaced. The total cost was \$3,477.75, an average of \$2.91 per sq. yd.

During the early part of the year the street department furnished the supervision and a small amount of material to the make-work jobs. The Summer make-work jobs, on the contrary, paid for all material, truck rental and labor furnished by the street department out of make-work funds.

Chloride was spread on those sections of streets that were improved and gravelled by make-work gangs.

The Lalor Avenue roadway under the railroad was in a dangerous condition with the guard rail falling over. In December, a stone retaining wall was built along East Creek bank to hold the roadway from sliding into the stream and to hold the guard rail firmly in position. At a very small cost, this job provided a wider roadway that allows room for pedestrians.

The routine work of cleaning and flushing pavements, cleaning gutters and picking up mud and leaves was carried on as usual. Equipment was kept in running condition, repairs being made at the City garage.

STREET DEPARTMENT COST TABLES

SEWER DEPARTMENT

On River Street, from Meadow Street to Otter Creek, the old sewer was replaced with new pipe of proper size. From Meadow Street to St. Joseph Street, 692 feet of 10" pipe was laid, thence 300 feet of 12", 300 feet of 15" and 62 feet of 18" pipe ending at the Otter Creek Outlet. Three manholes were built on this line. The drainage facilities in the vicinity of River, Meadow, Forest and South Streets are now greatly improved.

On South Main Street, starting 200 feet north of Curtis Avenue, a 10" sewer was laid deeper than the old sewer in order to obtain a proper run-off. This job was continued 172 feet south of Curtis Avenue.

When construction started on the Church Street culvert job it was necessary to relay the Tenney Brook trunk sewer with larger pipe, 38 feet of 20" being used west of Church Street center line and 44 feet of 18" pipe east of the same point. A deep manhole was built at the centerline, then 198 feet of 8" pipe was laid north on Church Street. This portion is under the culvert fill and was laid before the filling was done. The 8" sewer that emptied into Tenney Brook from Church Street south of the brook was extended across the culvert and connected into the trunk sewer.

The Howard Avenue sewer was extended east 20 feet with 8" pipe to accommodate a new house.

An 8" sewer was laid on Royce Street, from the point where the trunk sewer crosses, west 150 feet.

The relaying of a portion of Granger Street, south of First Street, sewer was under way at the close of the year, 50 feet of 8" pipe having been used.

A sewer was laid on North Street centerline from the Tenney Brook trunk sewer, west 302 feet with 8" and 10" pipe. Two manholes were built.

A change was made in the City Ordinances whereby the Sewer Dept. takes over the duties of drain layer. Since the ordinance went into effect, one new connection and one repair job have been done by the City.

GENERAL DEPARTMENT

The West Street bridge, which was described in the 1931 report, was completed during early 1932 at a cost of \$400.39, making the total bridge cost \$8,445.69. Of this amount the State paid \$5,000.00.

A reinforced concrete culvert was built on Church Street at Tenney Brook. Due to the high roadway fill at this point the culvert had to be exceptionally strong and heavy. A considerable saving in cost was made by incorporating the use of steel girders salvaged from Ripley Bridge in building the top deck. The total cost was \$3,256.88.

No extensive bridge repairs were required in 1932. The reinforced concrete bridges built during the past few years on the small streams require practically no repairs. There is only one large wooden structure, the '76 bridge, remaining in the City.

Culverts were maintained at very small cost. The most extensive work was on Campbell Road where an iron pipe culvert replaced an old stone and plank culvert that was caving in. Several smaller culverts on the same road were improved.

The dump on City property off Gleason Road was controlled by a caretaker who keeps rubbish properly placed and covered, thus preventing a nuisance.

The grass and shrubs in the Park were properly cared for during the summer and fall. In the portion of Main Street Park, south of Washington Street, the trees were trimmed to remove all deadwood. Previously a considerable hazard to pedestrians existed here.

Highway route markers were placed on some of the main roads and the location of some existing signs were improved. The "Ethan Allen Highway" signs were furnished by the Chamber of Commerce and the other standard route markers were furnished by the State at no cost to the City.

SEWER BOND DEPARTMENT

The trunk sewer from Pine Street to East Creek that is described in the 1931 report was completed early this year for \$2,404.90, making the total cost \$37,999.11 for 1,754 feet or an average cost of \$21.62 per foot. From Pine Street to the corner of Meadow Street and Blanchard Avenue, a distance of 1,203 feet, the sewer is a monolithic concrete, circular pipe, 60" in diameter. The remaining 549 feet to East Creek is reinforced concrete, box-section pipe, 5 feet high by 6½ feet wide.

On Sept. 1 there was a balance of \$11,362.38 in the Sewer Bond account. This was used to build part of the first unit of Moon Brook sewer, west of Forest Street. This first section of trunk sewer is a reinforced concrete, box-section pipe 4 feet high by 6 feet wide, capable of carrying a sewage and storm flow of 163 cu. ft. per sec. This is ample to care for the run-off during a typical five-year storm discharging down the Moon Brook and Mussey Brook Valleys.

Beginning at Otter Creek, a short distance north of Moon Brook, construction of the new pipe continued eastward toward Forest Street a distance of 960 feet, replacing the previously existing 18" pipe. The remaining distance to Mussey Brook junction is 784 feet which will require the same size pipe.

Dec. 31 there was a balance of \$281.25, making the net cost of the 4' x 6' pipe constructed in 1932 \$11,081.13, which is an average cost of \$11.55 per foot. This is only 71% of the anticipated cost of \$16.30 as estimated before construction began.

The concrete used was 1:2:4 mix; 3000 bags of cement at \$0.4468, 184 bags cement at \$0.585, 270 cu. yds. of sand at \$0.90 and 578 cu. yds. of stone at \$1.25 totalled \$1,448.23, \$243.00 and \$722.50 respectively.

Make-work labor, men designated by the Overseer of the Poor, were employed on this project. The balance, \$281.25 is approximately the amount that will be required to close the job in early 1933.

EMERGENCY MAKE-WORK

The work on Pine Hill that was underway at the close of 1931 was continued in early 1932. This improvement con-

sisted of cutting cord wood, removing brush, cleaning boundary lines and trails, etc. This work was carried out under the advice of Mr. Bradder, district forester.

In order to continue to aid the unemployed various other jobs were done in early 1932. The corner of Woodstock Avenue and Gleason Road was graded back to the street line. This improves the visibility for traffic approaching this intersection.

On Church Street a grading job was carried out in conjunction with the construction of the culvert over Tenney Brook, built by the General Dept. This consisted of cutting down the sections that were too high and moving the dirt and stone to make the required fill at the culvert. A second job was started on Church Street between Vernon Street and Field Avenue. Here a start was made to cut off the hill and fill the low land near Field Avenue.

A similar job was started on Pearl Street between Vernon Street and Field Avenue. On all of these jobs there still remains some work to be done to carry them to completion. The cost of this work is reported in the tables under the heading "Winter Make-Work." For these jobs the material and cost of supervision was paid for with the Street Department funds.

The "Spring and Summer Make-Work" consisted largely of improvement grading on streets that developed bad clay break-ups in early spring. On these streets the clay was excavated to a depth of about two feet, sub-drains were installed, a subbase of either crushed stone or cobbles was laid and the street then filled to grade with gravel. Twelve of these jobs were completed.

On these jobs a total of 5,420 cu. yds. of gravel was used.

In August, additional work was done on Church Street grading and culvert fill carrying it nearer towards completion. Due to the depleted state of funds in regular departments during this Spring and Summer make-work, all material and labor totalling \$4,868.12 supplied by the Street Department, was charged to make-work.

The performance of work under make-work funds terminated September 3, a total of \$28,707.95 having been spent.

WATER DEPARTMENT

This department functioned under the direction of Superintendent Edgar S. Beardsley.

Extensive work was done laying new mains, still continuing under the suggested program of the New England Insurance Exchange.

The Granger Street 12" main was laid from Franklin Street to First Street, a distance of 1,439 feet. Three 12" valves were installed on this line and proper connections were made with existing mains at River and South Streets.

In connection with this Granger Street job the small mains on James and First Streets were replaced with 667½ feet of 6" pipe which is the minimum size now used.

Also as part of the same improvement project a new main was installed on South Street, from Spruce to Meadow Streets, using 40 feet of 12" pipe, 400 feet of 8" and 1564 feet of 6". One 3" valve, 6-6" valves and 3-8" valves, a total of 10 were installed on this line.

A new main was laid on River Street from Forest Street to the Creek Road using 2,572 feet of 8" pipe and 272 feet of 6" pipe. The main across Otter Creek is Universal pipe which allows for expansion and contraction on Dorr bridge from which it is suspended.

On Spruce Street 496' of 6" pipe closed the section near the C. & P. tracks that previously had no main.

The above described jobs constitute a project that greatly improves the fire protection and domestic supply in that section. In 1933 the Granger Street main will be continued to completion.

Dead ends were eliminated in several locations. The Kingsley Avenue main was extended with 110 feet of 6" pipe and connected to N. Main Street. The same was done on Melrose Avenue with 191 feet of 6" pipe. On Jefferson Street the 6" main was extended to Bellevue Avenue and on Highland Avenue a 6" pipe was laid from Jefferson Street south to the existing main. This hook-up eliminated two dead ends. The Park Avenue 6" main, near the Manning Mfg. Co., was extended east 198 feet to Baxter Street.

The N. Main Street job that was in progress Dec. 31, 1931, was continued north to the city line, thence across a right of way just south of the City boundary line to Lincoln Avenue, and thence south on Lincoln Avenue to connect up with the previously existing Lincoln Avenue 6" main, thus completing the loop with 1267 feet of 6" pipe. Three 6" valves are on this part of the line.

On Church Street, north of Field Avenue, 699 feet of 6" main was laid to replace the inadequate pipe previously used. The Park Street 6" main near Forest Street was extended west 272 feet.

The amount of pipe laid on all these jobs totals 10,786 feet. In all 36 valves were installed.

Nine new hydrants of the latest type were added to the system. These, with the enlarged mains described, constitute a great improvement in fire protection facilities.

Hydrants were repaired when needed and during cold weather a patrol was made to keep the hydrants in proper working condition. Valves were installed on six hydrant branches that were not thus equipped.

Five cast iron, fire protection services were installed in the business district to furnish water for sprinkler systems. These were paid for at cost by the property owners as were the 21 regular copper house services installed. A large number of services, 106 in all, developed trouble and had to be repaired or relaid. The routine work of caring for and repairing meters, valves, shut-off boxes, and supply mains, as well as the care of the watershed and reservoir, was performed as required.

The main reservoir was cleaned during the summer to remove sediment and prevent algae growth. This was done with the co-operation and assistance of the Fire Dept. That department contributed the services of a pump truck and several men. Powerful streams of water are thus provided to wash down the reservoir sides and bottom.

No trees were planted in Mendon this year. The trees usually set out on the watershed were used on Pine Hill and paid for by the General Dept.

The main from Gleason Reservoir has been shut off, at a point near the east City line, during the entire year and now all water comes to the City from the main reservoir, therefore all water is treated with chlorine for purification. All water used in the city now passes through the Venturi meter and for the first time there is an accurate record of the water consumed.

December.....	31	87,040,000	2,808,000	162
	350	938,670,000	2,685,000	155

Population of the city; approximately 17,300.

The average consumption of water per capita per day was 155 gallons. In 1931 this was 160 gallons. The amount used by industrial plants and possibly by some domestic services was much less than in previous years. The receipts for the sale of water were \$49,182.28 in 1932 as compared with \$51,867.40 in 1931 and \$57,018.63 in 1930.

Trees on the watershed lands that were valueless as timber were sold for cordwood. Many individuals took advantage of this opportunity to obtain a season's supply of fuel at one dollar per cord on the stump. A total of 502 cords was sold in 1932.

The Overseer of the Poor had a crew of men cutting wood for fuel in Mendon during the last half of the year. The Water Department does not charge the Charity Department for this cordwood. To Dec. 31, 1932, 475 cords had been supplied to needy families from this source.

All of this cutting is done in locations designated by the District Forester, W. E. Bradder. All trees that are cut are designated as having no timber value. Thus the wood cutting not only nets the City a financial return but it is also working out part of the plan of the State Forester to improve the municipal forest.

ENGINEERING DEPARTMENT

As this department works in conjunction with all divisions of the Public Works Dept., its duties consist of making surveys and giving line and grade for all construction. Street lines and grades requested by property owners were given.

The Moon Brook Sewer system was designed before construction started on this important sewer unit. This included a comprehensive survey and preliminary design to provide for the entire Moon Brook and Mussey Brook valleys. Detailed plans were then made and the first section of sewer constructed. This first unit will fit in with and prove adequate for all future sewer development in these two brook valleys.

The Church Street culvert was designed to meet the particular requirements of the location. This structure consists of two 8 ft. spans and is 49½ feet long, the entire width of the street. The center pier forms two box culvert openings 8 ft. by 7 ft. The total waterway is 112 sq. ft., which is sufficient to care for freshet flows of Tenney Brook. The strength is adequate to support the enormous load of the deep dirt fill as well as the usual maximum highway load of a 20-ton roller.

Some surveying was done in Mendon as a continuation of the work of mapping the Water Department lands.

All plans, records, maps and notes were kept up to date and properly filed.

SUMMARY OF EXPENDITURES FOR PUBLIC WORKS AS COMPARED
WITH PREVIOUS YEARS

Streets.....	\$41,200 32	\$59,244 41	\$60,360 04	\$73,205 15	\$74,856 51
Sewer.....	10,122 28	22,900 17	23,478 53	24,303 18	25,070 55
General.....	7,374 93	15,691 66	15,520 44	13,287 58	18,368 20
Sidewalk.....	507 46	16,146 42	18,617 63	11,200 04	10,296 19
	\$59,204 99	\$113,982 66	\$117,976 64	\$121,995 95	\$128,591 45
Departments Spending Bond Money					
Trunk Sewer...	\$14,124 53	\$35,594 21			
Swimming Pool			*\$5,486 95	*\$27,738 54	
Department Spending Cash Receipts and Credits					
Water.....	\$45,405 68	\$56,221 56	\$63,931 16	\$49,979 22	\$51,388 64
Special Appropriations					
Make-Work	\$28,707 95				
Total.....	\$147,443 16	\$205,798 43	\$187,394 75	\$199,713 71	\$179,980 09

The comparative totals will show why the work, in the departments dependent on taxes for funds, was limited to little more than maintenance work in 1932.

The appropriations made for 1933 are as follows:

Street Dept., 20 cents on a dollar of the grand list which is estimated at.....	\$26,000 00
Street Dept., additional.....	6,046 00
For surface treatment of streets.....	8,000 00
Sewer Department.....	7,345 00
General Department.....	5,060 00
Sidewalk Department.....	1,500 00
Funds derived from taxes.....	\$53,951 00
Water Department.....	40,000 00
Total.....	\$93,951 00

This indicates that, with the exception of the Water Department, very little new work can be performed in 1933. A distinct improvement in the Street Department is the appropriation of \$8,000 for surface treatment. The use of this money for road oiling in conjunction with the expenditure of regular funds for grading, smoothing, shaping and patching will, it is hoped, improve the surface of streets greatly and provide safer and more comfortable roads. The dust nuisance at the same time will be reduced.

The Water Department will be able to practically accomplish the requirements set forth by the New England Insurance Exchange in 1923 and on which the Water Department has been working since 1925.

*Includes gift donations.

The money provided for the Sewer and General Departments is intended only for maintenance to meet the requirements of sanitation, rubbish disposal, bridge safety and such necessary functions.

During 1932, due to the decreased funds, the service rendered to citizens was necessarily curtailed, but the acceptance of these conditions by the people and their co-operation is very gratifying. I also wish to express my appreciation to His Honor, the Mayor, the Honorable Board of Aldermen, City Officials and the other City Departments, for their assistance and support. The members of the Public Works Department by their loyalty and efficient work have made the economical administration of the department possible.

Respectfully submitted,

EDWARD L. TRACY,
Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

Rutland, Vermont.

Gentlemen:

I hereby submit my report as Commissioner of Public Safety for the year ending December 31, 1932.

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, two Sergeants, eleven Patrolmen and fifty-four Special Officers.

275 arrests were made during the year for various offenses, 47 less than in 1931. 158 for intoxication, 14 for driving while under the influence of liquor, 21 for breach of peace, 2 for burglary in the night time, 11 for larceny, 1 for passing counterfeit money, and the remainder for various offenses.

During the year 2,623 lodgings were applied for and given, 105 business places were found open and taken care of by the officers, 45 street lights were reported out by officers.

During the year there were 29 miscellaneous thefts reported, and 26 places of business reported broken into. Ten automobiles were reported stolen during the year from the streets of the city and all were recovered and returned to the owners. Three automobiles that were reported stolen from other cities were recovered.

147 calls were answered by the police patrol wagon in which arrests were made and \$147.00 was collected and turned into the city court account.

I wish to thank the various business men that cooperated with this department by furnishing cars used in patrolling the city for a long period of time, also the members of the local American Legion Post for cars used for voluntary police patrol work during the past winter.

An inventory of apparatus and equipment on hand shows a total of \$6,858.00. Owing to the purchase of a light car for patrol work outside the business section the burglaries that were being committed regularly have apparently been checked.

FIRE DEPARTMENT

This report contains the membership, record of alarms, the cause thereof, the value of the property at risk, insurance carried and the loss or damage by fire as near as could be ascertained.

The Fire Department consists of one Chief Engineer, one Assistant Chief Engineer, two Captains, thirteen privates and seven call men.

The apparatus consists of two American LaFrance triple combination pumping engines of 750 gallons per minute capacity, one American LaFrance combination hose and chemical truck and one American LaFrance 75 ft. aerial ladder truck. Also a Cadillac service truck.

On December 31, while responding to an alarm the crankshaft in the Combination truck was broken and did damage to the extent of \$600.00. This truck has been in service since 1915 and it should be replaced by a new and modern pumping engine as soon as possible.

During the year the Department responded to 254 alarms as follows: Box alarms 31, telephone alarms, 215, verbal alarms 4 and automatic thermostat alarms 4. This is the largest number of alarms in any year in the history of the City. In addition to the fire calls there were ten special service calls such as taking cats from trees, assisting at drowning accident, using inhalator on a person overcome by gas, taking an injured man from a roof and a call to shut off an ammonia leak at the Brandon Inn.

The value of buildings and contents endangered was \$1,562,160.00. Insurance carried was \$1,245,976.00 and insurance paid was \$80,307.73 with a loss of \$1,000.00 not insured, making the total loss for the year \$81,307.73. Of this loss \$61,400.00 was at one fire which leaves a very small loss for the other fires.

During the year one fire alarm box was burned out and was replaced by a new and modern box.

The usual number of building inspections were made and conditions were found to be very good. There are a few buildings in the fire district which should be repaired or removed as they are a fire hazard in their present condition.

The inventory value of the property of the fire department is \$65,448.50 a copy of which is on file at the office of the City Treasurer. The cost of operating the Department for 1932 was \$37,531.25.

HENRY C. BRISLIN,
Commissioner of Public Safety.

Nov.	6 11:10 p. m.	Took cat from tree
Dec.	18 11:25 a. m.	Assisted at drowning accident

Report of City Attorney

To the Honorable City Council:

I hereby submit my report as City Attorney for the year ending December 31, 1932.

During the past year, the action in which the City was involved as Trustee, as a result of the Rocheford contract for building the Rutland High School, which action was brought in the United States District Court in the Boston and Vermont Districts, has been terminated, all matters pertaining to the High School contract closed to the satisfaction of the Committee, and all claims settled.

The pending action brought by Walter W. Seward against the City of Rutland, involving the timber rights and boundary lines in the City property in Mendon, while still pending, is in the process of adjustment, the parties having agreed upon a settlement.

There are now no further actions pending against the City.

During the past twelve months I have cooperated with the various City officials and I have advised and assisted them in their various departments.

With the City Tax Collector, I have collected all the outstanding taxes against the Buck Lumber Company, Inc., and their successors, the amount involved in total being about \$2,187.40.

During the year, nine insane paupers have been removed to the Waterbury Retreat at the expense of the State through the efforts of the Overseer of the Poor and the City Attorney and the City has thereby been relieved of their care.

As in the previous years, I have assisted the Overseer of the Poor in his work and through our joint efforts substantial savings for the Poor Department have been effected and unjust claims from other towns avoided.

During the year, I have been called upon and have performed various routine services for the various City officials, heads of departments and members of the Board of Aldermen, and have counselled with and advised them from time to time.

I have had complete cooperation from the various City officials and Committees and very much appreciate the willing and helpful attitude which all City officials and members of the committees have gone about the work entrusted to us during the year. Respectfully submitted,

CHARLES E. NOVAK,

City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1932.

CREDITS PAID TO CITY TREASURER FOR

Alfred LaJoyce	\$137 68	Howard Barthalamau	337 40
Gurney Ingram	50 25		
Donald Vondette	47 80	Total	\$789 59
Clayton Senecal	216 46		

During the past year assistance has been given to 505 outside poor families at a total cost of \$47,225.46, which is an average per family cost of \$93.52. This compares with a total of \$24,387.43 and an average of \$72.80 furnished to 335 families during the preceding year.

There were 55 inmates at the Farm, on the average, during the year 1932 and food cost a total of \$3,975 10, which is an average cost of \$72.28. During the preceding year 41 inmates were supported with a total food cost of \$3,210.70, an average of \$78.31 per capita.

Throughout the year 1932, 1768 transients were accommodated and consumed a total of 3,000 meals. The previous year 1,026 transients were given lodging and meals.

In addition this year we furnished 1,500 meals to men who sawed wood or did other work on the farm. All men thus helped were heads of families receiving aid from the City.

The computation above given is the per capita food cost at the farm and does not include the 3,000 meals served the transients and the 1,500 meals served to men working on the farm or sawing wood.

During the period from September 1, 1932, to December 31, 1932, wood was cut upon the City property in Mendon by men receiving aid from the city, the total amount of wood so cut being 475 cords of 4 foot wood. This wood was brought to the farm, sawed into usable lengths and delivered to outside poor for which the city was liable.

The Inventory of livestock, farm implements, etc., at the Farm as of December 31, 1932, amounted to \$7,097.91. This is an increase over last year's inventory which amounted to \$5,694 91. In accordance with requirements, a complete itemized inventory is on file in the office of the City Treasurer.

During the past year all property owned by the City at the Poor Farm has been kept in good condition and all minor and necessary repairs have been properly taken care of. The Farm, itself, has produced all its own milk and vegetables, and a part of the meat and butter required for the table. We now have a herd of 16 head of accredited cattle which are annually increasing in value, besides producing the dairy products required for the Farm. All of the labor, with the exception of \$110.25 paid for farm and house labor, was performed by the inmates.

Every possible precaution has been taken to provide proper sanitary conditions at the Farm, and the health of the inmates has been carefully looked after.

The unemployment situation and general conditions of distress and depression, which we have encountered beginning particularly with the year 1930, have not only continued unabated during the past twelve months, but seem to have increased. The statistics show the greater number that required care at the Farm and outside the Farm and every effort

has been made to keep the expenses at a minimum consistent with proper and healthful care of the City's poor. In spite of all organized effort in the community to care for the poor there was a great deal of distress during the past twelve months and the proper handling of the situation required the expenditure of a considerable amount above the appropriation, a situation which we were unable to avoid.

During the past year, as in the past, we have had the assistance of various officials, including the Board of Charities and Corrections and the Board of Aldermen, who have worked and cooperated with the Overseer. By their experience we have come to a better understanding as to the requirements of the poor in the City. Their cooperation has been appreciated, especially at times when the capacity of the department has been overtaxed, and their assistance has been invaluable in the investigation of cases.

The task allotted to the Poormaster, in a time of depression, is, at the very best, a trying one, and during the past twelve months the Overseer of the Poor and those connected with his department have done their very best to take adequate and proper and humane care of the City's poor at a minimum of cost to the taxpayer. We look with pride upon the record which this department has made in comparison with the total cost of poor in communities of our own size, and a comparison of the figures of this department with the figures of other communities will disclose a situation distinctly favorable to the City of Rutland.

We have had the cooperation and help of all City officials, including the continued helpful aid, assistance and real understanding from Mayor Perkins and those connected with his administration.

Again, in closing, we wish to express our appreciation to the City officials and all agencies who have assisted us in the work of relieving the poor during the past year.

Respectfully submitted,

FRANK W. DIGNAN,
Overseer of Poor.

Report of District Nurse

To the Honorable City Council:

I hereby submit the following report for the year ending December 31, 1932.

During the year the nurse has made 2040 nursing visits and made 356 welfare calls in 240 families; 75 prenatal visits with and for 30 maternity cases and supplying 33 layettes to expectant mothers. Supplies of medicines, clothing, furniture, bedding and milk have been used in 179 homes.

The expense of the year's work is as follows:

For salary	\$1,245 00
Supplies	68 00

This has been met by the annual Ward Canvass, which was \$430.00, the city appropriation of \$300.00 and patients' fees amounting to \$200. The balance was paid by the Rutland Missionary Society.

It has been necessary for the nurse to give more time to home visiting and Welfare work than in other years, also to meet more frequently with the organized Welfare Council to discuss home problems and seek advice as to methods of work.

The holiday season were busy days and much time was given to revising lists so that all families who were looking to us for aid in the way of dinners and gifts for their children might not be disappointed. All the Welfare organizations of the city worked together to make it the best year in our history.

The afternoons of the first week in September were given over to supervising the Rest room for mothers and infants at the Fair, an attractive room being fitted up for this purpose by the Red Cross in connection with their First Aid work.

We were very materially aided during the year by clubs, church groups and kindred organizations as well as by citizens, all of which helped to make a successful year; another aid to our work was the access to the supplies sent to us by the Government: flour, cloth, underwear, stockings, hose, and pants for men and boys.

The nurse thanks all organized groups and individuals for their support and loyalty, and the giving of time and money to help carry on the work and keep a nurse in the field the entire year.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse.

Report of Health Officer

To the Honorable City Council:

Rutland, Vermont.

Gentlemen:

I herewith submit my report, as Health Officer for the year ending December 31, 1932.

The following communicable diseases were reported:

Measles	1,055
Mumps	898
Whooping Cough	110
Scarlet Fever	78
Chicken Pox	47
German Measles	4
Erysipelas	2
Total	2,194

The epidemic of Mumps and Measles developed in March and reached such proportions in May that it became necessary to apply to the School Department and Town Health Officer for assistance which was generously given.

Inspections at the water shed were made at regular intervals. On July 28th Mr. Waterman, State Sanitary Engineer, and Mr. C. P. Moat, State Chemist, made the annual inspection for the State Board of Health. Samples of water were sent daily to the Department of Hygiene for examination. While the reports from the Department showed a wholesome water at all seasons, an odor developed in July, presumably from silt deposits and weed growth. On Aug. 4th and 5th the reservoir was cleaned under the direction of Mr. E. S. Beardsley, Supt., of the Water Department.

Samples of water from the swimming pool were taken daily while in operation and sent to the Department of Hygiene.

Regular monthly meetings of the Board of Health were held and under their direction many health measures have been successfully carried out. Owing to the lack of funds the immunization program was necessarily postponed. 512 city inspections were made. These included routine and sanitary inspections and calls answering complaints. Eight sudden deaths were investigated.

Total number of plumbing inspections of old and new work 38.

In conclusion, I wish to express my appreciation to the various departments for their co-operation and especially to the School Department for their efficient and tireless efforts in assisting us during the epidemic and to the Fire Department in answering and recording calls, without whose assistance, we would have been greatly handicapped.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Milk Inspector

Rutland, Vermont

To the Honorable City Council:

Rutland, Vermont.

Gentlemen:

I herewith submit my report as Milk Inspector for the year ending December 31, 1932.

Total number of dairy and creamery inspections 768.

Total number of milk and cream samples sent to the Department of Hygiene for examination 589. Experimental samples were taken at the various dairies and creameries together with 165 sediment and lacto-densimeter tests. Temperature tests were taken frequently during the summer.

The following licenses were issued,

Producers	81
Retailers	97
Peddlers	16
Wholesalers	2

Total 196

The sum of \$442.00 was collected for milk licenses and turned over to the City Clerk.

Notwithstanding the low price of milk with its demoralizing effect, we have with splendid co-operation on the part of the milk-men, been able to maintain our usual high standard of milk.

Respectfully submitted,

CLARE M. COLE,
Milk Inspector

Report of Department of Public Health

Statistics for 1932 compiled from certificates filed in the City Clerk's Office.

CIGRID B. PATCH,
Treasurer.

Report of Board of School Commissioners

To the Mayor, Board of Aldermen and Citizens of the City of Rutland:

The Board of School Commissioners believes that it is the duty of a representative body to formulate policies which shall be in accord with the seasoned judgment of a majority of the people. Acting on this policy we have expanded the school program in years past so that boys and girls would be prepared to live in a machine age. It has been our policy, moreover, to improve the surroundings of the children and increase the value of school property by a program of improvement which called for a relatively small outlay each year. We believe that most people desire to continue the school program so well begun but the ability to pay for many things, no matter how desirable, has been limited the last two years.

Realizing that public expenditure depends on the ability of the people to pay taxes, we have tried to reduce the cost of schools. The reductions made necessary by the times have been spread over all the activities of the schools in such a way as to make the effect as little felt as possible.

We are glad to report that the close of the fiscal year found us able to pay all the bills of the school department and carry forward a small balance of \$168.46. The balance in deferred payments on teachers' salaries of \$7,753 belongs to the teachers having been taken out of their salaries from September to December to provide for payments to them during the summer months. In view of the great difficulty in balancing budgets, both public and private, and in view of the fact that our budget had to be reduced after the year was well started, we feel that this is worthy of mention. About ten per cent of our income is derived from sources other than local taxation so our ability to pay all bills is due in part to the ability and willingness of others to pay their bills.

The changes made in the budget for 1933 which will be reflected in the taxpayer's bill, can be indicated by certain facts. The City Appropriation for 1930 including special tax of ten cents for heating plant at Meldon School was \$181,227.73. The City Appropriation for 1931 including special tax of five cents for repairs was \$173,049.12. The City Appropriation for 1932 including \$3,129.47 received from the State

on account of the repeal of the law providing for a tax on intangibles was \$155,131.07. The proposed City Appropriation for 1933 (approximately the same amount may be received from the State as in 1932) is \$145,200.00. The city appropriation has been decreased from 1930 to 1933 \$36,027.73.

The tax rate for 1930 was: regular \$1.15, repairs at Meldon \$.10, from intangibles the equivalent of 9.5 cents, making a tax rate the equivalent of \$1.345. The tax rate for 1931 was: regular \$1.15, general repairs \$.05, from intangibles the equivalent of 8.8 cents making a tax rate the equivalent of \$1.288. The tax rate for 1932 was: regular \$1.15, and the equivalent of 2.4 cents on account of money received from the State because of the repeal of the law providing for a tax on intangibles making a tax rate the equivalent of \$1.174. The tax rate for 1933 has been set at \$1.10. The tax rate has in effect been decreased from 1930 to 1933, 24.5 cents.

Salaries have been reduced ten per cent and personnel has been reduced eight per cent, thus accounting for over \$18,000 of the total decrease. The reduction in the appropriation for the repair of buildings, the repair and replacement of furniture, apparatus, and equipment accounts for a large percentage of the balance.

A limited appropriation for the repair of buildings would be bad policy if continued for a very long time. It happens that our buildings have been gradually improved during the last ten years so that the decreased appropriation will cause less harm than usual. Our present appropriation is enough to cover the repairs that are vital to the preservation of buildings and the operation of the schools. We cannot, of course, lay sidewalks, put in curbs, paint buildings, improve grounds, or do many other desirable things under present conditions, but a more prosperous day will come when delayed improvements can be made.

We have made every effort to arrange affairs so that the reduction of our budget will not be reflected in the quality of the service rendered the children. The children will, of course, suffer some inconvenience and will be forced to rely to a greater degree upon their own resources, but this will probably be good for them. Our teachers have shown a commendable spirit in increasing their efforts so that the children of today will not be hampered in living tomorrow. In common with other good citizens, we regret the necessity of cutting the school budget. But, in the circumstances, we believe the reduction in school costs is necessary and reasonable.

We believe that the children of our city are fortunate to live in a locality where tax delinquency is rare and where extremes in progress or reaction are alike unknown.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS,

By JOSEPH F. CRONAN, President.

Rutland, Vermont, February 6, 1933.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the fortieth annual report of the Rutland Public Schools and the twelfth under the present administration.

About three hundred years ago the first public school in America was established in the Massachusetts Colony and the sum of twenty pounds was voted for its support. From the time of this meager beginning to the present the public school has grown steadily, and so rapidly in the last generation that today one person out of every four is engaged, either as a pupil or teacher, in the public and private schools of the United States. An enterprise which furnishes the major occupation for one quarter of the people of a great country and is regarded by the leaders of yesterday and today as the most important institution in a democratic society deserves serious consideration by all classes of people.

It is not an accident that the schools are held in such high esteem by the fathers and mothers of America but it is the gradual growth of the idea that human beings can be improved by education and that ignorance and democracy cannot thrive together. In the present economic emergency there is no loss of faith in the value of public education and the standards of the schools will not be lowered if the people can be correctly and convincingly informed regarding the need of maintaining a desirable program of education.

There are a few hysterical people who advocate drastic changes in school costs without stopping to consider whether the plan they advocate is really economical or within the realm of reason. Changes in the school program should be made only after responsible people have become convinced that they are necessary and desirable. When such changes are contemplated particular consideration will, of necessity, be given to the part the school will be called upon to play in the future.

The evidence that we are entering a new economic era is accumulating daily. As the curve of production goes up the curve of employment goes down, and the story for the future would seem to be more and more goods with less and

less labor, which may mean a perpetual problem of unemployment. We may find it necessary to prolong the period of education in order to prevent young people from competing for jobs in a market already glutted with workers. Moreover, if we are entering a new era, the youth of the land will need a longer period of preparation to fit them to live under new and trying conditions.

Every community has its quota of people who talk much and think very little. These people are fond of discussing what they are pleased to call the "fads and thrills" of education which, according to the oft-repeated story have come to "dominate the school." There is no subject offered in the schools of today which would not be approved by fair minded persons if they informed themselves about the value of that subject. The fundamental processes of reading, spelling, handwriting and arithmetic are given more time and are better taught than ever before. In addition to these subjects time is now found for many other important elements of a child's education. One would have a very limited outlook on life who advocated the elimination of music and drawing because these subjects probably have as great an influence in developing desirable citizens and neighbors as the three R's. The value of health and physical education is so well recognized that all a producer or merchant has to do is to connect the word "health" with his product to insure a large volume of sales. As a matter of fact, the "fad and frill" idea is commonly used by people who have not secured full and accurate information. Perhaps it is assumed that the newer subjects cost more to teach than other subjects or that the cost of providing opportunity for new subjects is added to the cost of the old. On the contrary, the cost of education is based upon the number of pupil and teacher hours which makes the cost about the same whether the curriculum has ten or twenty subjects. For instance, the cost of teaching twenty-five girls in a class in drawing is about the same as the cost of teaching the same girls in a class in geometry. A pupil can be provided with instruction in high school music for a full year for \$15.76 while to instruct him in mathematics will cost \$15.78. Physical education can be provided for one pupil for a full year for \$15.17 while the cost of English is \$17.39.

The cost of operating the schools of Rutland has been reduced to such an extent that the city appropriation for 1933 is twenty per cent less than it was in 1930. Since the number of pupils is increasing in the upper grades, where the cost per pupil is highest, it is evident that the school department

has done its fair share toward reducing the burden of taxation. Up to this time it has been possible to spread the additional burden in such a way as to minimize the effect on the individual child. However, these changes have resulted in larger classes, reduced salaries, more work on account of a decrease in personnel, and the delay of necessary repairs to school buildings.

The present economic situation may be regarded as an indication that there might be important changes in the subject matter offered in the schools, especially the junior and senior high schools. It is true that the fundamental economic problems which confront the mass of our people ought somewhere to receive consideration. The public school may not be the place for a study of theoretical economics, but it is a good place for a study of savings, life insurance, installment buying, sales resistance, home ownership and individual economic independence. The greatest handicap to the development of a curriculum which has a greater meaning in life, is the hold tradition has on the patrons of our schools. If English or Latin grammar was the principal intellectual diet of the past generation the tendency is to demand the same training for the children of today. The leaders in education are ready to try to teach a more effective and happy way of living as soon as subject matter can be organized and teachers are trained in new fields.

The people of Vermont have been ardent believers in education for generations, so there is little chance of any change during the present depression which will be to the disadvantage of the children. Our people are more likely to be lenders than borrowers indicating a prudence and frugality which results in the ability to support the necessary functions of government even in "hard times."

The schools of Rutland are on a sound financial basis and enjoy the confidence of our citizens to such a degree that we enter the new year without apprehension regarding the support of the educational program.

Respectfully submitted,

WILLIAM W. FAIRCHILD

Superintendent of Schools

Rutland, Vt., Feb. 6, 1933.

Report of Auditors

January 26, 1933.

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners, from January 1, 1932 to December 31, 1932, inclusive, and we hereby certify that, IN OUR OPINION, they have duly accounted for all monies received by them, and they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners and found them to be correct.

The books of the City Treasurer are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1932, and the result of operations for the twelve months' period then ended.

Respectfully submitted,

EARLE T. TOWER,
GEO. A. SABIN,
JOHN W. BURKE,
Auditors.
